How to Test Flow on the Gaggia Velasca and Velasca Prestige

1. Unplug your machine from the power outlet
2. Press and hold 'Espresso' and 'Menu' (Velasca) or 'Espresso' and 'Special Drinks' (Velasca Prestige) and then plug the machine back in.
3. Once the software version appears on the machine display, you may release the buttons
4. Press 'Steam/Cappuccino' 4 times
5. "EV | PUMP" will appear at the top of the display
6. Press 'Espresso'. The display will now read "EV1 = ON"
7. Place a cup beneath your Pannarello wand/hot water spout
8. Press and hold 'Hot Water/Milk Froth'
9. Water should begin dispensing from the Pannarello wand (Velasca) or hot water spout (Velasca Prestige)
10. Take note of the number next to "L/H"
11. Stop holding 'Hot Water/Milk Froth, and press 'Espresso' to turn "EV1 = OFF"
12. Press 'Steam/Cappuccino' 5 times
13. "BU" Will appear at the top of the display
14. Press and hold 'Espresso' until the display reads "WORK = Y"
15. Press 'Steam/Cappuccino'
16. Place a cup under your coffee dispensing spout
17. Press and hold 'Hot Water/Milk Froth'
18. Water should begin dispensing from the coffee dispensing spout
19. Take note of the number next to "L/H"
20. Stop holding 'Hot Water/Milk Froth
21. Press 'Steam/Cappuccino' 5 times
22. Press and hold 'Espresso Lungo' until the display reads "HOME = Y"
23. Unplug the machine, wait 10 seconds, and then plug the machine back in.
24. As long as the 'L/H' reading while performing the tests wasn't 0, you should be able to progress past the loading screen and through initial rinsing.
