

Rancilio Silvia

Thermostat Replacement Instructions

The following instructions are designed to make the replacement of the thermostats in your Silvia quick, easy, and safe. Please read the entire instructions before you start and make sure the machine is unplugged and completely cool before attempting anything.

1. Unplug the Silvia
2. Remove the water tank.
3. Remove the four screws on the top cover.
4. Remove the top cover by lifting it up and out.
5. You will see two beige thermostats on the top of the boiler. While facing the front of the Silvia the one on the left with the red dot is the brew thermostat. The one on the right is the steam thermostat. Remove the wires from both sides of the thermostat that you going to replace.
6. Unscrew the outside screw on the hold down clip, bend the hold down clip up and remove the thermostat. If you would like you can replace the entire hold down clip. Be careful not to drop the small hold down screws into the Silvia they are very difficult to get at when they fall.
7. Screw the clip back down and put the two wires onto the new thermostat.
8. Screw the top on, install the reservoir and plug the unit back.
9. Turn the main power switch on and test it out.
